

2020-21 Middle School Summer Assignments 7th Grade Language Arts/Algebra Honors

Reading:

- **7th Grade Assigned Reading:**

This year, 7th grade will select one book to read from the following list of books: *We Beat the Streets* – Sampson Davis and George Jenkins, *The War that Saved My Life* – Kimberly Brubaker Bradley, *One for the Murphys* – Lynda Mullaly Hunt, *War Horse* – Michael Morpurgo.

When students have finished reading, they will need to create 3 different creative journal entries (pages). Ideas include - setting, characters, plot, theme, and free choice entries. Journal entries need to be completed on notebook paper and labeled. In order to receive full credit, each journal must include: graphics with color and writing that includes text evidence and analysis (thought prompts). Entries should be detailed, thoughtful, and creative. Students will submit their journals for credit on the first day of school in August. This assignment is worth 50 points. They should also bring their book with them to school for the first week as we will be discussing the books in class.

- **Choice Reading:**

While students are only required to read one book, reading all summer long is encouraged. Choose novels that interest you and are on your reading level. It is good to challenge yourself a little! Please see reverse side for suggested authors. **Remember, reading is the single most important factor in student success.**

Algebra:

The **7th Grade Algebra Math Packet** can also be accessed through the LCC Day School Website. Summer math is assigned to help students retain math skills and enable the math classes to spend less time reviewing past material and forge ahead with new math skills. The Summer Math Packet has been designed to review topics students learned during the past school year. These topics are crucial for success in the next grade level. It is highly recommended that students complete a portion of the packet each week (approximately 20 minutes). This will ensure the skills are being reinforced weekly and the students do not become overwhelmed during summer break.

All students are expected to complete the entire Summer Math Packet to the *best of their ability*.

Students should show their work so we can see the thought process used to complete the problems.

Please circle or box your final answer. Please keep in mind we are looking for *good effort* at completing the problems more than a correct answer. Good effort includes attempting the problems and showing the work/thought process used to achieve an answer. Students may use online resources (see back) for help, if necessary, or work with a friend. **The Summer Math Packet is due on the first day of school, August 12, 2020.** The Summer Math Packet is a 50 point assignment. Keep in mind that we are looking for *good effort* more than correct answers!
