

Dear Parents of Rising Third Graders,

Happy Summer! Congratulations on your child's successful completion of second grade. We hope your family enjoys a restful and fun-filled break. While summer is a time for play, exploration, and making memories, it's also important to keep young minds active and engaged. To support your child's continued learning, we're providing a few assignments for reading and math enrichment.

Math:

The summer math packet is designed to help students keep their math skills fresh and ready for the upcoming school year. By reviewing key concepts from the past year, students will be better prepared to dive into new material without spending too much time on review.

We recommend that students work on the packet a little each week to keep the practice manageable and avoid feeling overwhelmed. All students are expected to complete the entire packet to the best of their ability. Please encourage your child to show their work, as this helps us understand how they approached each problem.

Reading:

To kick off the year, our first theme unit will be *Chocolate*! To get us started, we're requiring every student to read ***The Chocolate Touch* by Patrick Skene Catling** over the summer. After reading, choose **one project** from the list below to complete and bring it to school on **August 12th**. Be ready to share your project with your class!

Choose **one** of the following projects:

Collage

- Make a collage with a mix of images and text. It must represent knowledge of characters, setting, and plot. The plot is what happens in the story; the story's events.
- Include the title and the author.

Comic Strip

- Design a comic strip illustrating a major scene in the book. It must be colorful and represent knowledge of the characters, setting, and plot.
- Include the title and author.

Book Review

- Write a one-page review of the book. Please explain your favorite and least favorite parts of the characters and plot.
- Include the title and author.

For additional independent reading, we have included a suggested summer reading book list. There are so many exciting stories just waiting to be discovered. We couldn't possibly name them all! Encourage your child to read 15 minutes a day. Two BINGO boards are included to check off as your child reads this summer. The goal is to fill in at least three rows per board. Any completed BINGO boards should be returned to their new third-grade teachers on the first day of school.

We hope your summer is packed with fun, exploration, and lots of great reading. See you in August!

At LCCDS, we learn Spanish through stories, music, and games throughout the year. I hope we can continue the fun over the summer so we don't forget all we have learned. A few of my favorite ways to practice my Spanish at home are listed below.

- **Play Games - There are many gaming sites** available, but my favorite is Duolingo. Duolingo is a free app that allows users to practice new language skills in a fun, effective, and highly customized manner. Students complete mini-lessons, answer questions, translate, and more. The program assesses your language ability, and the lessons change to match it. Fabulagua has a free trial and is a story-based learning game. The Canticos app is also a free app that is great for younger learners that is bilingual with music, stories, and games.
- **Listen -** Podcasts are a great way to have students hear the language. A great one for beginners is “¡Cuéntame! Learn Spanish with Comprehensible Input” by Marta Ruiz Yedinak, which is the closest to how LCCDS teaches, using acquisition-driven learning. Another great option is the “Garbanzo Spanish podcast”; others include “Eat Your Spanish: A Spanish Learning Podcast for Kids and Families!” by Evan Blum. For our intermediate Spanish speakers, there is “Spanish Stories for Kids.” Both of these podcasts are available anywhere you get your podcasts on Apple or Android.
- **Watch TV-** No, I am not joking! We learn Spanish by acquiring it the same way we acquired our first language. TV shows that interest students are a great way to hear the language and see it in context. There are many stories and cartoons on streaming sites in Spanish to discover. My favorite way to watch Spanish shows is to find something I already enjoy and set the subtitles and audio to Spanish. Many streaming services also have a feature to slow down the audio so that it can be slower and easier to understand.
- **Additional Resources-** spanishplayground.net has a plethora of comprehensible videos on their website. Rockalingua has a few free music, stories, and games, but it is a paid service.

¡Feliz Verano! ¡Hasta agosto!

Happy Summer! See you in August!
